Problems of Communism

For the fiftieth anniversary of Sputnik, the behind-the-scenes story of the fierce battles on earth that launched the superpowers into space. The spy planes were driving Nikita Khrushchev mad. Whenever America wanted to peer inside the Soviet Union, it launched a U-2, which flew too high to be shot down. But Sergei Korolev, Russia's chief rocket designer, had a riposte: an artificial satellite that would orbit the earth and cross American skies at will. On October 4, 1957, the launch of Korolev's satellite, Sputnik, stunned the world. In Red Moon Rising, Matthew Brzezinski takes us inside the Kremlin, the White House, secret military facilities, and the halls of Congress to bring to life the Russians and Americans who feared and distrusted their compatriots as much as their superpower rivals. Drawing on original interviews and new documentary sources from both sides of the Cold War divide, he shows how Khrushchev and Dwight Eisenhower were buffeted by crises of their own creation, leaving the door open to ambitious politicians and scientists to squabble over the heavens and the earth. It is a story rich in the paranoia of the time, with combatants that included two future presidents, survivors of the gulag, corporate chieftains, rehabilitated Nazis, and a general who won the day by refusing to follow orders. Sputnik set in motion events that led not only to the moon landing but also to cell phones, federally guaranteed student loans, and the wireless Internet. Red Moon Rising recounts the true story of the birth of the space age in dramatic detail, bringing it to life as never before.

Much of what was central to Tolstoy seems embarrassing to Western and Soviet critics, points out Richard Gustafson in his absorbing argument for the predominance of Tolstoy's religious viewpoint in all his writings. Received opinion says that there are two Tolstoys, the pre-conversion artist and the post-conversion religious thinker and prophet, but Professor Gustafson argues convincingly that the man is not two, but one. The Collapse of the Soviet Union

The typical military history presents a chronicle of battles and wars and the commanders and troops who fought them. This book
takes a different approach. It presents battles and wars and people aplenty, but they are not its ultimate subjects. This book is about
the turning points that not only make military history dynamic but crucial to the story of humanity and civilization. This book is
about the decisions, acts, innovations, errors, ideas, successes, and failures that shaped the evolution of military art and
science—strategy, tactics, and technology—and, in doing so, shaped the course of world history. Here are the 100 points—from the
birth of warfare in the Battle of Megiddo, 1457 BC, to the ongoing evolution of military history on its newest battlefield,
cyberspace—at which the path of the warrior decisively turned on its long journey to where we find ourselves today.

Towards a Future European Peace Order? explores the prospects for an international peace process emerging in the aftermath of
the Cold War. Inspired by the basically peaceful revolutions of 1989 in Eastern Europe, fourteen contributors from both East and
West present their views and visions for a continent undergoing rapid transformation on the eve of the twenty-first century. Their
perspectives are based on analyses of the underlying political, historical, societal, psychological, strategic and economic
preconditions for a European peace order.

Russians in Hollywood, Hollywood’s Russians

Illustrated Weekly of Pakistan

Written by Stu Maschwitz, co-founder of the Orphanage (the legendary guerrilla visual effects studio responsible for amazing and award-winning effects in such movies as Sin City, The Day After Tomorrow, and Harry Potter and the Goblet of Fire), this book is a must-have for all those budding filmmakers and students who want to produce action movies with visual effects but don’t have Hollywood budgets. The Orphanage was created by three twenty-something visual effects veterans who wanted to make their own feature films and discovered they could do this by utilizing home computers, off the shelf software, and approaching things artistically. This guide details exactly how to do this: from planning and selecting the necessary cameras, software, and equipment, to creating specific special effects (including gunfire, Kung Fu fighting, car chases, dismemberment, and more) to editing and mixing sound and music. Its mantra is that the best, low-budget action moviemakers must visualize the end product first in order to reverse-engineer the least expensive way to get there. Readers will learn how to integrate visual effects into every aspect of filmmaking—before filming, during filming and with “in camera” shots, and with computers in postproduction. Throughout the book, the author makes specific references to and uses popular action movies (both low and big-budget) as detailed examples—including El Mariachi, La Femme Nikita, Die Hard, and Terminator 2. Best known today as the author of War and Peace and Anna Karenina, Count Leo Tolstoy also is acknowledged as a skilled playwright. His five-act drama The Power of Darkness offers a cold and unsparing look at Russian peasant life that illustrates the costs of pursuing personal desires rather than the dictates of morality. The grimly realistic tragedy is based on a real incident, centering on a peasant’s confession to a party of wedding guests of his participation in a series of horrific crimes that range from adultery and murder to infanticide. Tolstoy’s moving portrait of a class enslaved by poverty and ignorance was written in 1886, but its performance was suppressed by Russian authorities until 1902. A 1904 version, performed in New York in Yiddish, marked the first successful production of a play by Tolstoy in the United States.

Given the resurgence of Russian economic capabilities and of Russia’s role as a regional, even global, political actor, much of the literature written more than 4-5 years ago is already dated. The editor and contributors to this timely volume draw upon a broad range of analysts who deal with various aspects of Russian relations with its neighbours to the West and to the East. Implications for Russian foreign and security policy are key to understanding Russia’s position in the 21st Century. Readers in Russian foreign and security policy; European, Eurasian, and Asian security; and contemporary international politics/security will find this volume invaluable.

Peta Wilson has joined the ranks of television’s new breed of kick-ass heroines in La Femme Nikita, the USA Network’s edgy and stylish show. She plays Nikita, who has been wrongly convicted of a murder, and is pressed into service by a secret government group. Wilson brings an extraordinary mix of compassion and tough-street smarts to her role as Nikita, and the show has gone from cult hit status to its position as the number one original cable drama in the US. This is the first book of any merit to be written about her.
