Readable and concise, this Brief Edition of THE EARTH AND ITS PEOPLES: A GLOBAL HISTORY provides the essential narrative of world history in an abbreviated format. This global text employs the fundamental themes of “environment and technology” and “diversity and dominance” to explore patterns of humans' interactions with their surroundings and with each other. The authors’ approach shifts the focus away from political centers and power, revealing how humanity continues to shape and be shaped by our environments, and how dominant structures and traditions are balanced and challenged by alternate beliefs. Special emphasis is given to technological development and how it underlies all human activity. Western Civilization: A Global and Comparative Approach

General Catalog -- University of California, Santa Cruz
This text combines study of the dynamic historical development of each religious tradition with a comparative thematic structure. Students are encouraged to discover and explore the nature of religious experience by comparing basic themes and issues common to all religions, finding connections with their own personal experiences. By sensitively introducing descriptive material within a comparative thematic structure, this text helps students to understand how each religious provides, for its adherents, patterns and meanings that make up a full way of life.

Das zweite Konzil von Lyon (1274) The conquest of Constantinople by the Fourth Crusade shattered irreversibly the political and cultural unity of the Byzantine world in the Greek peninsula, the Aegean and western Asia Minor. Between the disintegration of the Byzantine Empire after 1204 and the consolidation of
Ottoman power in the fifteenth century, the area was a complex political, ethnic and religious mosaic, made up of Frankish lordships, Italian colonies, Turkish beyliks, as well as a number of states that professed to be the continuators of the Byzantine imperial tradition. This volume brings together western medievalists, Byzantinists and Ottomanists, combining recent research in the relevant fields in order to provide a holistic interpretation of this world of extreme fragmentation. Eight stimulating papers explore various factors that defined contact and conflict between Orthodox Greeks, Catholic Latins and Muslim Turks, highlighting common themes that run through this period and evaluating the changes that occurred over time. Particular emphasis is given on the crusades and the way they affected interaction in the area. Although the impact of the crusades on Byzantine history leading up to 1204 has been extensively examined in the past, there has been little research on the way crusading was implemented in Greece and the Aegean after that point. Far from being limited to crusading per se, however, the papers put it into its wider context and examine other aspects of contact, such as trade, interfaith relations, and geographical exploration.

The Crusades, 1095-1204 The second edition of Historical Dictionary of the Crusades is an accessible one-volume overview of the medieval crusades to the Middle East between 1095 and 1291, with substantial information on crusades in southern France, Italy, Spain, and the Baltics that take the timeline into the 14th century.

Medieval Women and War The scholarship of this book is based upon the personal experience of author Benjamin Lee Wren, who taught ‘World Civilization’ for six years at the high school level and 35 years at the university level. The book stresses that ‘World Civilization’ should be taught at all levels of academia because, due to the innovations of the last hundred years, the world has evolved into a ‘global village.’ The author firmly believes that one cannot have a true grasp of history without an active knowledge of geography and how it is affected by terrain, climate and neighboring countries. Key elements discussed are: the importance of writing techniques and examples of major systems; the foremost philosophies, religions, and turning points in history down to 1650; major contributions to world civilization; recommended source materials for both instructors and students; and various methods and techniques for creating and fostering enthusiasm within the classroom.

Hybride Kulturen im mittelalterlichen Europa/Hybride Cultures in Medieval Europe

Commanders For the first time, Sophie Harwood uses the Old French tradition as a lens through which to examine women and warfare from the 12th to the 14th
The result is a skilled analysis of gender roles in the medieval era, and a heightened awareness of how important literary texts are to our understanding of the historical period in which they circulated. Medieval Women and War examines both the text and illustrations of over 30 Old French manuscripts to highlight the ways in many of the texts differ from their traditionally assumed (usually classical) sources. Structured around five pivotal female types - women cited as causes for violence, women as victims of violence, women as ancillaries to warriors, women as warriors themselves, and women as political influences - this important book unpicks gendered boundaries to shed new light on the social, political and military structures of warfare as well as adding nuance to current debates on womanhood in the middle ages.

History Today

The Crusades Indispensable for the student or researcher studying women's history, this book draws upon a wide array of cultural settings and time periods in which women displayed agency by carrying out their daily economic, familial, artistic, and religious obligations. Since record keeping began, history has been written by a relatively few elite men. Insights into women's history are left to be gleaned by scholars who undertake careful readings of ancient literature, examine archaeological artifacts, and study popular culture, such as folktales, musical traditions, and art. For some historical periods and geographic regions, this is the only way to develop some sense of what daily life might have been like for women in a particular time and place. This reference explores the daily life of women across civilizations. The work is organized in sections on different civilizations from around the world, arranged chronologically. Within each society, the encyclopedia highlights the roles of women within five broad thematic categories: the arts, economics and work, family and community life, recreation and social customs, and religious life. Included are numerous sidebars containing additional information, document excerpts, images, and suggestions for further reading. An introduction provides an overview of the daily life of women through history, and a timeline highlights key events in women's history. Chronologically arranged sections on civilizations from across world history provide information on the daily life of women living in those societies. For each civilization, broad categories of daily life are broken into subsections, with each offering reference entries on specific topics. Photos help users visualize important topics, and sidebars provide interesting tangential information. Bibliographies direct readers to additional resources.

The Oxford Encyclopedia of Medieval Warfare and Military Technology In 1202, zealous Western Christians gathered in Venice determined to liberate Jerusalem from the grip of Islam. But the crusaders never made it to the Holy Land. Steered forward by the shrewd Venetian doge, they descended instead on Constantinople, wreaking terrible devastation. The crusaders spared no one: They raped and massacred thousands, plundered churches, and torched the lavish city. By 1204, one of the great civilizations of history had been shattered. Here, on the eight hundredth anniversary of the sack, is the extraordinary story of this epic catastrophe, told for the first time outside of academia by Jonathan Phillips, a leading expert on the crusades. Knights and commoners, monastic chroniclers, courtly troubadours, survivors of the carnage, and even Pope Innocent III left vivid accounts detailing the events of those two fateful years. Using their remarkable letters, chronicles, and speeches, Phillips traces the way in which any region steeped in religious fanaticism, in this case Christian Europe, might succumb to holy war.

Contact and Conflict in Frankish Greece and the Aegean, 1204-1453 From the Viking invasions to the Crusades to the Hundred Years War, wars were crucial agents
of change in medieval Europe. They fostered many economic and political changes. They also affected the science, technology, religion, and culture of the parties involved. This two-volume encyclopedia examines all aspects of warfare and military technology in medieval times. Featuring the latest research from the leading experts in medieval military history, the set provides an exhaustive and accurate view of how and why wars were waged throughout Europe, the Byzantine Empire, and the Crusader States from circa 500 CE to circa 1500. Although many reference works have been published in medieval history, this is the first and only encyclopedia to focus exclusively on medieval warfare, offering unique insight into the subject by addressing developments in military technology across the period with articles on topics such as gunpowder and shields. The encyclopedia will appeal to scholars and readers of all levels interested in military history and in the medieval world.

Geschichte der Kreuzzüge Renowned medieval historian Jill N. Claster examines warfare between Christians and Muslims for control of the embattled city of Jerusalem.
